Response to Amendment

1. Applicant's amendment of January 14, 2005 is acknowledged and entered.
2. Applicant's amendment has been fully considered, however, a new rejection is regretfully submitted as follows.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 3-8, and 10-15 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,669,105. Although the conflicting claims are not identical, they are not patentably distinct from each other because the means for producing an aerosol spray as recited in claim 1 of the instant invention and the aerosol producer as recited in claim 10 of the instant invention are both the same as the means for producing an air volume through the nozzle to entrain the insecticide liquid as particles as recited in claim 1 of '105.

Applicant is kindly invited to call the examiner with any questions regarding this action.
